

2017 State Target Response to Opioid Crisis (STR) Community-based Organization (CBO) Grant RFA RFA #18/19-008

Questions and Answers

July 14, 2017

Q: What is expected to implement the Environmental Strategy for Prescriber Education? Can you direct me to more information?

A: There is not a set curricula to follow, more of a strategy with a locally developed action plan for engaging providers. We are working with LNI and their [prescribing guidelines](#), and want providers to use those in their training, but you can propose a plan for how you would want to do that. This might include conducting a general training on the issue or host a roundtable with prescribers.

Q: Can any of the money be used to purchase secure lock boxes to be used in public places for needles?

A: Unfortunately, no. The Environmental Strategy option for Secure/Safe Home Storage Events or Sites are restricted to medications only, and are not meant for secure needle public drop sites.
