

Student Survey

Version: All Stars Posttest BD— MD

You are invited to participate in the evaluation of an education program for young people. The results of this evaluation will help teachers be more effective at preventing risky behaviors and teaching good health practices.

All students in your class are being asked to participate and your parents or guardian have been informed about this project. Participation will involve answering several questions about a variety of health topics, including questions about your attitudes towards substance use, handling stress, and goal setting.

This is not a test. The right answer is the one that best tells who you are, what you think, or what you believe.

Do not write your name on this survey.

All information collected from you will be **CONFIDENTIAL** and **ANONYMOUS**. Your teacher, school officials, police, or parents will not be able to know the identity of the person who completes this survey. If you have any questions about this survey, please ask your teacher.

Your participation is **VOLUNTARY**. If you do not wish to complete this survey, you may raise your hand and tell your teacher or you may leave the survey blank. If you wish to stop in the middle or skip some questions, leave blank whatever questions you do not want to answer.

Please mark your answers using a dark pencil like this ●, not like this ⊗.

Erase any answers that you change completely.
