

DBHR Lending Library Process

1. Coalition Coordinator makes a request to the Prevention System Manager they work with for the curriculum they would like to check out.
2. The Prevention System Manager coordinates a response to the request with headquarters staff including the following information:
 - If the curriculum is currently available, a determination will be made when and how the materials can be delivered to the requesting Coalition Coordinator.
 - If curriculum is currently checked out, the number of people on the waiting list will be identified, an approximate wait time will be determined, and the name of the coordinator making the current request will be added to the wait list in the order received with the date of the request noted.
 - The system manager will let the coordinator know the status of the request and the approximate delivery date and means.
3. The amount of time materials may be checked out is a total of three weeks, including delivery time, to ensure access to materials by others.
4. Coalition Coordinators are responsible to return materials by insured mail; the return address at DBHR headquarters and a contact name and number is included on all curriculum materials.
5. Contact Prevention System Managers with questions as well as requests.

Thank you for your interest!

Curricula List
