LOCKS SAVE LIVES

Ease of access is the #1 reason youth misuse prescription drugs. YOU can save a life by storing prescription medication at home in a locked location. It's easy & important!

A national study indicates 29% of parents with children 18 years-of-age and younger report storing medication safely in the home—in a locked or locked location. (Medwatch, 2017)

We can do better. Together, we can achieve 100%.
www.LockSaveLives.org

Did you know the most common drugs misused by teens & adults come from family & friends' home medicine cabinets? 75 percent of opioid misuse starts with using medicine not prescribed for them. Proper disposal of unwanted & expired medication using a take back program protects loved ones & keeps medicine out of the wrong hands.

Did you know medications not disposed of properly end up in the environment? Let's work together to keep these substances out of the wrong hands & our landfills & waterways. Source: SAMHSA

Find year-round or mail-back medicine disposal programs:

SAFELY STORING AND DISPOSING OF MEDICATIONS BENEFITS EVERYONE'S HEALTH AND WELL-BEING.

Storing medicine in a locked location and proper disposal are the most effective deterrents to accidental poisonings, overdose, medicine theft, and misuse that can lead to prescription drug addiction. Stay informed and talk with loved ones about the risks for ingesting or taking medicine not prescribed for them and benefits of safeguarding your medications. Follow these healthful tips to keep your medicines safe and loved ones free from harm.

SMART MEDICINE STORAGE TIPS

- At home and on-the-go, store medicine safely in a locked location away from people and pets. Learn more at LockSaveLives.org.
- Resist the urge to keep medicine handy by returning it to a locked location after each use.
- Use child-resistant caps and close the caps tightly after each use.
- Don't share prescription medication with others as it's illegal and may cause them harm.
- Keep inventory of medicines to know how many pills are left and if any are missing.
*WASHINGTON POISON CENTER 800-222-1222

PROPER MEDICINE DISPOSAL TIPS

- Dispose of all unused and expired medicine immediately and properly.
- Do not place medicine in the trash or recycling, and never flush it down the toilet or drain as it pollutes the environment and waterways.
- Properly dispose of expired and unwanted medicine by dropping it off at a drug take-back event, a year-round disposal site or dispose of it by mail. Learn more at MED-Project.org or bit.ly/DEATakeBack.
