

Why LifeSkills

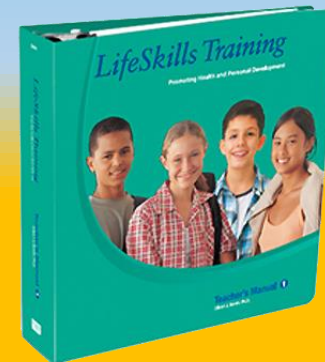

Planning

- Meeting with principal and health teachers
- Weekly meetings to discuss how implementation would work
- Taking a look at the logistics
 - How many student
 - How many class periods and how long
 - Day of the week
 - What platform to use
- How are we going to implement through google classroom?
 - What should class look like?
 - How should we access the learning platform
 - What do we do about tech issues?
- Moving forward with our plan (BE FLEXIBLE THROUGH IT ALL!!!)

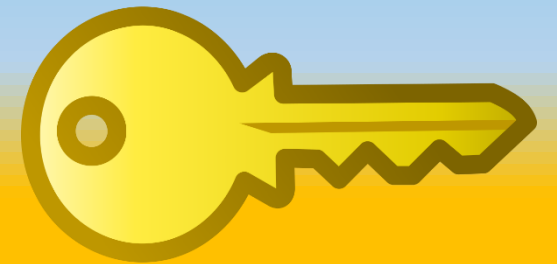

- Attended Botvin LifeSkills webinars on how to implement virtually
- Purchase materials
 - Key Codes (360 of them)
 - Teacher Manuals (Not very user friendly)
- Emails back and forth to make sure we had what we needed

Working w/ Botvin

Key Codes For Class Entry

- Assign ALL key codes in advance
- All student broken down by class periods
- Create a master spreadsheet of all class periods w/all students and their key code
- Create a back up plan for key code entry
- Send an email to every student with their key code before the first class

Setting Up Class Through Google Classroom

- ✓ Pre-Test
 - ✓ Done through google forms
- ✓ Watch each module and formulate a lesson outline
 - ✓ I did the first three weeks in advance and then did each week the week before
 - ✓ Create google doc or google slide for each student to engage in a supporting activity for each module
 - ✓ Write down key points
 - ✓ Record how long each video lesson takes
- ✓ Each student had to have a “copy” made for them in each class
- ✓ Google classrooms were set up by each health teacher, but is easy to do yourself

Google Classroom

Implementation

Session 1 – Welcome to LifeSkills!

Time to put it all together!

(use your outline)

Session 2 and Beyond

Every week is different!

(Don't be afraid to get CREATIVE)

- Use your outline as a guide
- There will be tech problems every week
- Discussions should be fun and relatable
- Encourage participation
- Make adaptations as necessary
- It's o.k. to not cover everything in the manual
